

CONSTRUCTION TOOL SERVICE

TOOLS, SUPPLIES, AND SAFETY PRODUCTS FOR CONTRACTORS

JANUARY/FEBRUARY/MARCH 2018

The SR-24 is a precision utility locating instrument with GPS and Bluetooth® technology for easy integration with external data capture devices.

The SR-24's omnidirectional antennas capture the complete signal field, making it easy to acquire the signal and trace its path. The receiver displays the utility's position and direction on the display, providing an intuitive locating experience. For added confidence, audio and visual warnings notify the operator if the shape of the signal field is being distorted so that appropriate action can be taken to avoid mismarking the utility's position.
